

Weight Loss Drugs Coverage Information

Effective Aug. 31, 2025

Important Coverage Information

As of **Aug. 31, 2025**, DHA will have revised prior authorization requirements for weight loss drugs. The revised prior authorizations exclude:

- **TRICARE For Life** beneficiaries
- Beneficiaries only eligible for care at military hospitals and clinics
- Beneficiaries with NATO status or Partnership for Peace Agreement

If you're in one of these groups, you're not eligible to fill your prescriptions at military pharmacies and will have to pay full cost to acquire the drugs elsewhere, even if you had an approved prior authorization before August 31.

Scan the QR code below to learn more about coverage for weight loss drugs.

If you're affected by this change:

Talk to your provider to review your options for alternative treatments

Look for a letter in the mail explaining the details from Express Scripts

If you're enrolled in one of the following plans and continue to meet prior authorization criteria, your coverage is not changing.

TRICARE Prime
(including the US Family Health Plan and TRICARE Prime Remote)

TRICARE Select

TRICARE Reserve Select

TRICARE Retired Reserve

TRICARE Young Adult

Continued Health Care Benefit Plan

TRICARE will continue to cover select drugs (e.g. Ozempic, Mounjaro, Trulicity, Victoza) for all patients for the treatment of diabetes when medically necessary and when prior authorization requirements are met. Existing copayments or cost-shares for these drugs haven't changed.
